Incredible in Every Detail

At Royal Canin, our mission is to unlock the magnificence inside every cat and dog. We partner with breeders, veterinarians, universities and other experts to create formulas that meet each cat and dog's nutritional needs based on their breed, size, sensitivities, life stage and activity levels.

RESEARCH AND DEVELOPMENT

We don't provide one-size-fits-all solutions. Royal Canin knows that every cat and dog has different nutritional needs based on breed, size, life stage, lifestyle and reproductive status. We use research and development to formulate nutritional solutions that are specific to each and every one of these changing needs.

COMMITTED TO QUALITY AND FOOD SAFETY

We are committed to innovation in health and nutrition and to improving the lives of the cats and dogs we serve. Our quality and food safety systems are state of the art, and we continue to invest in new technology to ensure they remain that way.

- We perform thousands of quality checks every month to ensure food safety, traceability and quality.
- Our plants are ISO 9001:2008 certified for Quality Management and ISO 2000 certified for Food Safety for all healthy pet products.

At Royal Canin, the health and safety of cats and dogs is of the utmost importance; our first priority is the quality and safety of the food we provide to cats and dogs.
